

## Done Last Sprint

### Front-end:

- 1-Add pages to query page (Yiu Ming Wong)
- 2-Fix nav-bar (Ivan)
- 3-Use boot-strap to improve css (Ivan)

### Back-end:

- 1-Load csv file with county geolocation & # accidents for county map (Estela)
- 2-Paginate query page to reduce render time. (Yiu Ming Wong)
- 3-Implement function to return data for swarm plot (Ivan)
- 4-edit button (Estela & Thuan)
- 5-Implemented StateIndex and SeverityIndex(Thuan)
- 6-Implemented Results Cache and Result class for incremental analytics(Thuan)

## Todo List Sprint

- Timing for incremental analytics
- Update functions in results to update analytics.
- Implement unit cases / CI
- Implement more robust error checking for adding record
- Make home page prettier
- Add date into display table
- Add number of accidents color scale to counties map
